[REDACTED]

- I certify that the dog presented for examination today is the dog identified above.
- I agree to this information being used (in confidence) by veterinary surgeons or geneticists researching into the problem of heart murmurs and heart disease in dogs.
- In certain breeds where a heart testing scheme is established, I agree to the information being collated by a nominated person, committee or breed council (where applicable) and published according to breed guidelines.

Signed (Owner): J Frater Date: 10/10/19

SECTION B (to be completed by cardiologist) I AM NOT ON DOPPLER LIST

I have today, 10/10/19, examined the dog identified to me as above.
 Conditions for auscultation:
 Degree of dog's movement fairly still fidgety restless
 Degree of stress/excitement minimal slight moderate
 Amount of respiratory noise minimal slight moderate
 Room (background) noise minimal slight moderate
 X = No & ✓ = Yes

I could **not** detect the presence of an obvious heart murmur in this dog at the time of examination (0/6)
 I detected a murmur of grade 2/6 intensity*. Please refer to individual breed club/council recommendations.
 Range: _____ PMI: _____ Radiation: _____ RHS TI
 Heart rate: 120 Rhythm: regular Ectopics? Precordium: _____
 Further investigation into the cause of the murmur by means of Doppler echocardiography is recommended if a definitive diagnosis of the cause of the murmur is required and to provide a prognosis.
 This dog is a puppy; it should be re-checked when over 12 months of age.
 This dog is a breed that should be checked annually.
 I found evidence of another heart abnormality (Comment):*
 Electrocardiography was performed and was: NORMAL / ABNORMAL / EQUIVOCAL (Comment):*
 2D / M-Mode / Doppler (Delete as applicable) Echocardiography (cardiac ultrasound) was performed and was:
FS 25-28% NORMAL / ABNORMAL / EQUIVOCAL (Comment):*
EF 64%
LA & LV normal
 * Your veterinary surgeon is welcome to contact the veterinary cardiologist for further details about these findings.
